

AUTO-TICKET CLASSIFICATION USING FLOW DESIGNER

Complete 8-Phase Project Documentation

Project documentation organized according to the eight required project phases.

Project Phases

1. Phase 1: Brainstorming & Ideation
2. Phase 2: Requirement Analysis
3. Phase 3: Project Design
4. Phase 4: Project Planning
5. Phase 5: Project Development
6. Phase 6: Project Testing
7. Phase 7: Project Documentation
8. Phase 8: Project Demonstration

Phase 1: Brainstorming & Ideation

Project Title

Auto-Ticket Classification using Flow Designer

Problem Identification

The school IT helpdesk receives support requests such as Wi-Fi issues, projector failures, password problems, and slow computers. IT staff manually review each ticket and select the appropriate category and subcategory, requiring additional time and effort.

Proposed Idea

Use ServiceNow Flow Designer to automatically classify IT tickets based on keywords in the ticket short description.

Main Idea

Student creates ticket → Ticket is stored → Flow Designer is triggered → Short Description is checked → Keyword is identified → Category is assigned → Subcategory is assigned → Email notification is sent.

Objectives

- Automatically classify IT incidents.
- Reduce manual classification work.
- Improve ticket routing efficiency.
- Maintain the solution using Flow Designer.
- Improve consistency in ticket classification.

Phase 2: Requirement Analysis

Existing Process

9. Student or teacher creates an IT support request.
10. IT staff review the ticket.
11. The issue is identified.
12. Category is selected manually.
13. Subcategory is selected manually.
14. The caller is informed.

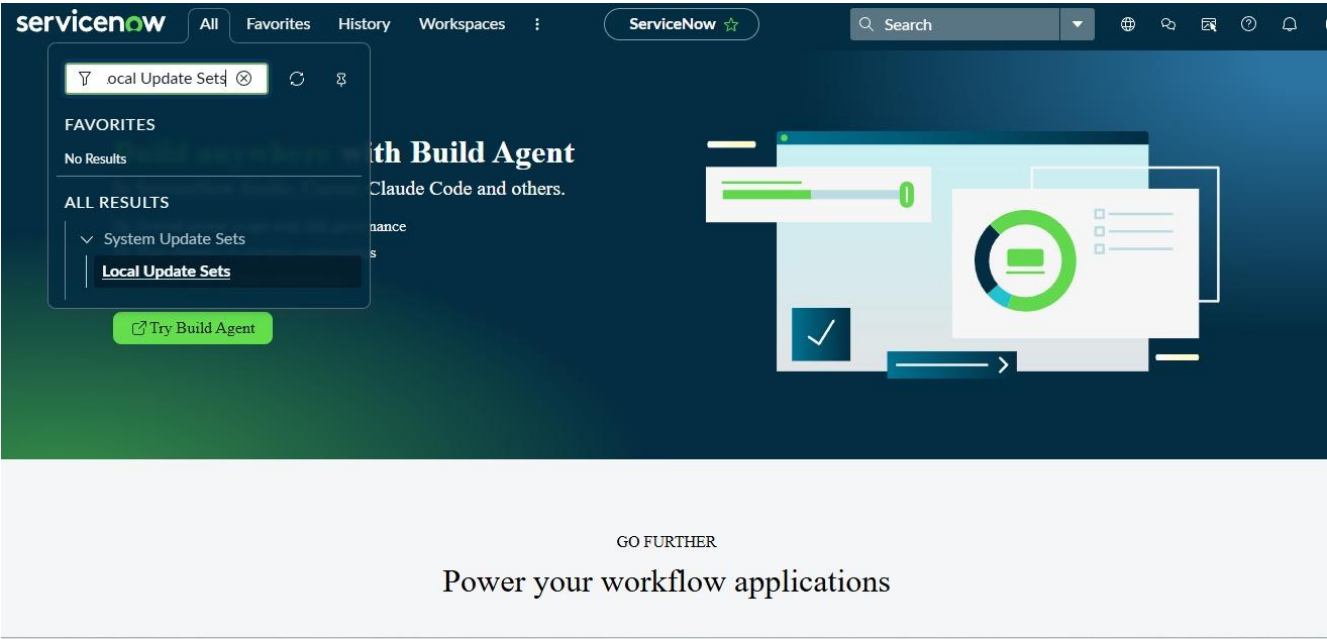

Business Requirements

- Automatically classify IT tickets.
- Automatically assign Category and Subcategory.
- Maintain dependency between Category and Subcategory.
- Send an automated email notification.
- Store ticket information in a structured format.
- Be easy to maintain and extend.

Update Set

Name	Project Update Set
State	In Progress
Application	Global

Screenshots

ServiceNow interface showing the 'Update Sets' section. The table lists update sets with columns: Name, Application, State, Installed from, Created, Created by, Parent, and Batch Base.

Name	Application	State	Installed from	Created	Created by	Parent	Batch Base
Default	Global	In progress		2026-06-12 14:20:10	system	(empty)	(empty)
Project Update Set	Global	In progress		2026-09-21 22:34:11	admin	(empty)	(empty)
