

## Phase 7: Project Documentation

### Project Documentation

The completed documentation contains the project requirements, design, development process, Flow Designer automation, testing results, and deployment information.

### Update Set Completion

15. Open Local Update Sets.
16. Open Project Update Set.
17. Change state from In Progress to Complete.
18. Save.
19. Select Export to XML.
20. The Update Set XML file is downloaded.

### Project Result

The project provides an automated ticket-classification process using ServiceNow Flow Designer. The system classifies tickets based on descriptions, assigns Category and Subcategory, and sends an email notification to the caller.
